Tansy
Thyme

Vines:

Akebia
Bittersweet
Boston Ivy
 Clematis
 Dutchman’s Pipe
 English Ivy
 Honeysuckle
Silver Lace Vine
Virginia Creeper
Wintercreeper
Wisteria

*Deer often stay clear of plants that are poisonous, fuzzy, coarse, spiny, bitter or aromatic. If deer are unclear about something, they’ll try it, so even plants that are classified deer resistant aren’t always safe. When natural food is scarce deer can stomach almost anything, but they usually avoid these plants if other food is available.
